

Sahil Vora

Student — Teaching Assistant
Arizona State University

Email: svora7@asu.edu
Mobile: +1 (602)-919-9535
LinkedIn: [sahil-vora](#) Github: [sahilvora10](#)

EDUCATION

Ira A. Fulton Schools of Engineering, Arizona State University (ASU)

Tempe, United States of America

Masters of Science - Computer Science - Thesis; GPA: 4.0/4.0

August 2022 - Present

Related Coursework: Digital Video Processing, Social Media Mining, Fund. of Statistical Learning, Software Security, Knowledge Representation & Reasoning, Semantic Web Mining

Manipal Institute of Technology

Manipal, India

Bachelor of Technology - Computer and Communication Engineering; GPA: 8.69 /10

July 2016 - June 2020

Specialization: Big Data

Delhi Public School, Bokaro Steel City

Bokaro, India

Grade XII; Percentage: 93.4%

May 2016

Delhi Public School, Bokaro Steel City

Bokaro, India

Grade X; GPA: 10/10

May 2014

TECHNICAL SKILLS

- **Cloud Platform and Database:** Google Cloud Platform, Salesforce B2C Commerce, AWS, MYSQL, PSQL, MongoDB
- **Languages and Libraries:** Python, Java, JavaScript, C++, C#, Pandas, NumPy, Keras, Selenium
- **Frameworks and Tools:** Spring, Hibernate, ASP.NET, Git, Jenkins CI/CD

WORK EXPERIENCE

Developer Summer Analyst Intern

New Jersey

Barclays

June - Present

- Implementing and developing a chatbot to automate Frequently Asked Questions and integrate with MS Teams and Confluence.
- Developing a messaging queue system library using **Python, Kafka, and Solace** that will help to communicate between various systems throughout the bank.

Graduate Service Assistant

SCAI, ASU

Prof. Baoxin Li

January - Present

- Accelerating MRI scan duration with a goal to reduce the time by 30% using computer vision.
- Developing deep learning algorithms for improved speed across multiple MRI scans from various vendors.
- Improving scan quality through noise reduction techniques and preventing loss of data.
- Implementation of Diffusion based and semi-supervised techniques and models to remove noise from MRI scan and also help in super-resolution.

Teaching Assistant: Introduction to Software Engineering (CSE 360)

SCAI, ASU

Prof. Lynn Robert Carter

January - May 2023

- Developed and implemented an effort logging system, similar to JIRA, to provide hands-on experience to students in software development and project management.
- Facilitated course delivery in software development and AGILE methodologies.
- Mentored students in enhancing their skills through regular one-on-one sessions and clarifying technical concepts.

Volunteer Research Member

Lab V2, ASU

Prof. Paulo Shakarian

September - November 2022

- Contributing towards the project with the professor and helping generate data for different experiments and models.
- Work towards machine learning fairness and implementing logic gates to understand hypotheses testing using neural networks.

Teaching Assistant

SOMSS, ASU

Prof.: Younghwan Kim (MAT 211), Chandrani Banerjee & Lance Ward (MAT 117)

August - December 2022

- Helping the instructor during the lecture and assisting students in solving doubts and queries regarding College Algebra and Business Mathematics.
- Helping to proctor and grade the quizzes and homework during the course.

Software Developer 1

Bangalore, India

Sabre Corporation

October 2021 - July 2022

- o Achieved successful **production migration** for company products and applications to **Google Cloud Platform**.
- o Worked to enhance the Visual Content Management Platform - application to handle image and video data and create new service endpoints using REST and Spring.
- o Handled the role of a **mentor and product lead** to help new interns gain and learn about software and cloud development.

Associate Software Developer 1

Publicis Sapient

Gurgaon, India

January - October 2021

- o Built an end-to-end functionality using **Google AI** to show product recommendations on the entire website.
- o Improved the e-commerce website for **zero percent failure** rate during peak traffic periods.
- o Worked as a **Subject Matter Expert** to train and mentor people in the field of Salesforce Commerce Cloud (SFCC).
- o Performed development responsibilities to include new features and provide end-to-end flow, including Home Page, Product page, Checkout, Payment flow, and post-order processing using Salesforce B2C Commerce.
- o Used and added **Google Analytics** to payment pages to track the traffic flow for an e-commerce website.
- o Developed an internal website to support easy onboarding of freshers to the corporate world.

Computer Vision Research Assistant Indian Institute of Space Science and Technology, ISRO, Kerala, India

Advisor: Dr. Deepak Mishra

Dec 2018 - January 2019

- o Selected for the IIST Winter Research Fellowship program and worked on **Phase Recovery for Holography using Deep Learning**.
- o Used Deep Learning and Computer Vision to generate models and pipeline to create high-resolution hologram images with no physical equipment needed in the process.

PROJECTS

- **Echo Chamber detection in Social Media (ASU, September-November 2022)**: Developed an Echo Chamber Detection Algorithm in Social Media using network and content features. This algorithm helps find similarity measures between users' timelines with the help of embedding tweets using SBERT and NLP. Echo Chambers detection helps in finding political polarization and the spread of misinformation. The project was developed using *Python, Gephi, PyTorch, scikit-learn, HuggingFace Sentence Transformers, Tweepy*.
- **COVID-19 Vaccine Stance Detection (ASU, August-September 2022)**: A Social Media exploratory project created as an objective to understand different attitudes towards COVID-19 Vaccines through Tweets. The algorithm takes various tweets based on hashtags for Pro Vaccine and Anti Vaccine campaigns and conveys results overseeing the cluster formations, how well these campaigns are connected, determination of epi-center for campaigns, etc. The project was developed using *Python, Tweepy, Pandas, NumPy*.
- **Wordle Analytical Dashboard (March - July 2022)**: A live real-time dashboard that fetches multiple tweets around the game and helps players analyze how everyone is playing which automatically updates every day and updates the statistics of the day created using *Python, Google Data Studio, Tweepy, Heroku and Kaggle*.
- **E-Commerce Object Detection & Classification (March-June 2019)**: A classification and bounding-box object detection project that classifies e-commerce products into various categories and also identifies the primary product from an image that was developed as a part of 7 days Flipkart (under Walmart) Machine Learning Challenge created using *python, OpenCV*.

PUBLICATIONS

- **Vora**, "Phase Recovery for Holography using Deep Learning", International Research Journal of Engineering and Technology (IRJET), vol. 8, i. 3, no. 96, March 2021, [Online serial]. Available: [archives/V8/i3/IRJET-V8I396](https://www.ijert.org/archives/V8/i3/IRJET-V8I396)

HONORS AND AWARDS

- Achieved the **Kaggle Dataset Expert** for securing bronze medals for publishing various open-source datasets on Kaggle, April 2022
- Awarded the Publicis Sapient Recognition Award for **Employee of The Month** for October 2020
- Awarded the **Top Performer Award** for best performance in training at Publicis Sapient, June 2020
- Bagged the **first position** in university **Flipkart Grid - Teach the Machines** Machine Learning Challenge, 2019

COURSES AND CERTIFICATIONS

- **Salesforce Certified B2C Commerce Developer**, Dec 2020 (21736760)
- **Graph Analytics for Big Data** by UC San Diego, Coursera, Oct 2019 (H45QQSSFSGJR)
- **Machine Learning With Big Data** by UC San Diego, Coursera, Oct 2019 (H9XRJDS4SBWM)
- **Deep Learning Specialization** by deeplearning.ai, Oct 2018 (RKDH9A4JTTMH)
- **Machine Learning** by Stanford-Online, June 2018 (9FNU4Z86YXNN)

EXTRACURRICULAR ACTIVITIES

- **Administrative Roles**: President at The Photography Club, Manipal
- **Volunteering**: Red Cross Society for Blood Donation Drives
